

Please reject the National Association of Broadcasters' petition 04-160. I use XM satellite radio throughout the day, and it has better music and radio programs than any of my local stations. I pay \$10 a month for my XM subscription, and I don't understand why some special interest group is allowed to dictate what I get for my money. If my local radio stations provided decent programming, I wouldn't be subscribing to XM satellite radio.

Sincerely,

Stephen Porter
